

GOLDMUND
SWISS MADE

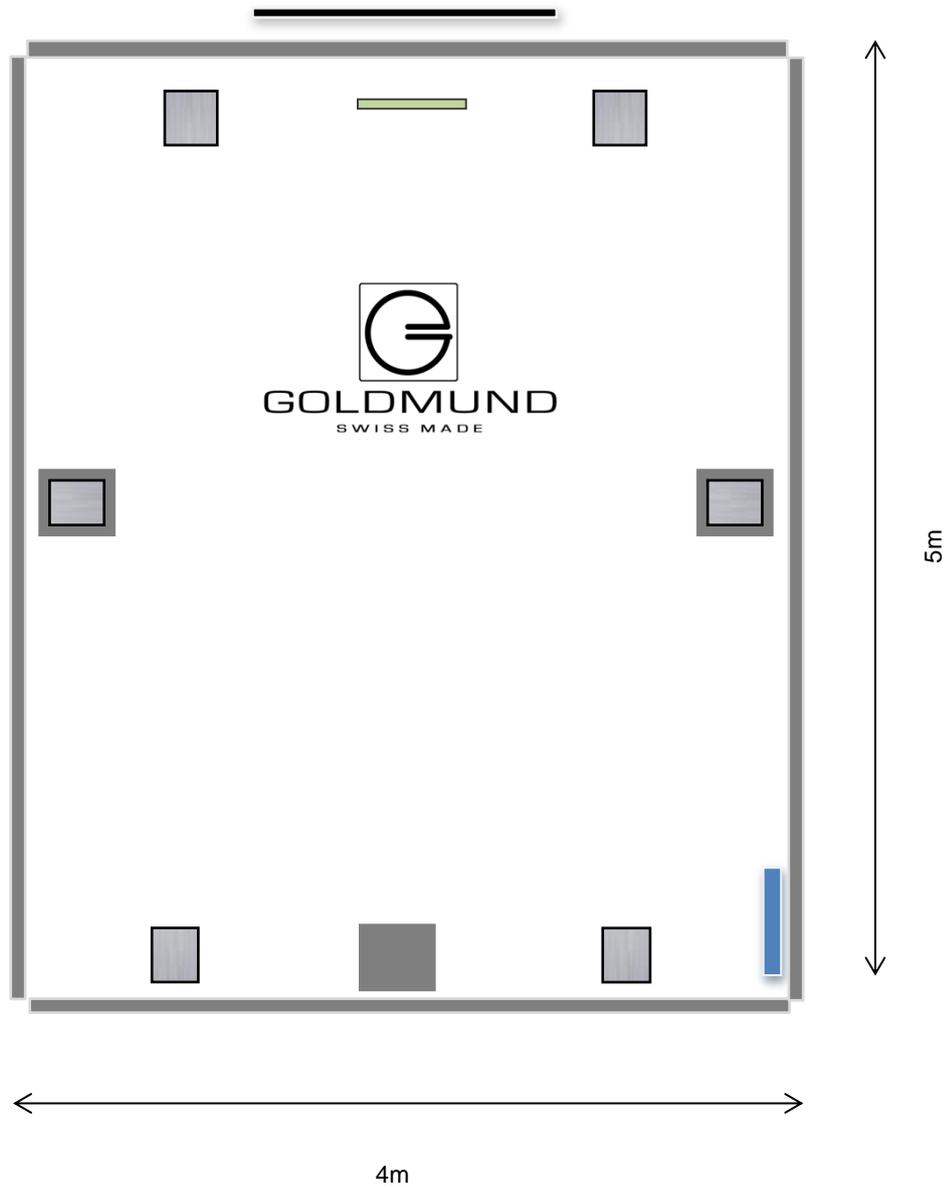

Metis System Description:

Compact in size and brilliant in performance, the Metis system is the perfect example of big things in small packages. It suits the small and medium rooms, living room, bedroom and conference rooms. Designed with elegance, the system can also be made partially wireless. The Metis system exudes a luxurious contemporary feeling and gives the room a new dimension.

The system comprises of Metis speakers, Metis subwoofer, Metis player and Metis processor. Configuration of the speakers and subs would change according to the size of the room. It gives amazing performance as it incorporates two of Goldmund's main technologies Leonardo and Proteus thus making exceptionally efficient.

In this system example, the center signal is mixed in the left and right speakers. The result is that you hear it coming from the center of the screen, exactly where it should come from. This is the Phantom speaker technology used by Goldmund for rooms using screens that are not acoustically transparent.

Metis System room configuration plan:

*Scale: 1cm = 0.4m – based on the system presented on the picture page 1

This Metis System Consists of:

- 1) Metis Speakers – 6 units
- 2) Metis Sub – 3 units
- 3) Metis 30U – 1 unit
- 4) Metis 10 – 1 unit

Brief Product description:

Metis Speakers: The Metis speakers are hand made using treated aluminum that confers it a luxurious look and an absolute longevity. The speaker use Leonardo correction and has built-in double Telos amplification with electronic crossover.

Metis Subwoofer: The Metis subwoofer is very compact but retains the quality of ultra-clean bass response without overemphasis. The subwoofer is capable of clean response down to 20Hz which is very rare for such small subs. The frequency response has been tuned to exactly match the Metis speakers so they can work together ideally.
